 **Vanmaye Publications Private Limited**

Welcome to the world of learning! Our books from nursery to fifth are specially designed for young learners, marking the beginning of an exciting educational journey. Our integrated series, **SANKALP**, has been carefully crafted to support the learning journey of our young explorers as they embark on their pre-primary and primary education.

The Semester Series-**SANKALP** is written in accordance with the guidelines of **NCF-2023** (National Curriculum Framework). It is an integrated course comprising a set of books for pre-primary and primary classes. Each book has the core curricular subjects: English, Maths, Evs, Science, Social and GK. The series is well-graded and takes the child smoothly from easy to difficult and known to unknown. Each lesson is meticulously planned to promote active learning, creativity, and social interaction. **SANKALP** is designed to foster a love of learning and stimulate curiosity and provides a solid foundation for future academic success.

Apart from books, the teachers are assisted with audio–video support, lesson plans, answer keys, question papers, and workshops (online). Our team of experienced educators and subject matter experts has worked tirelessly to ensure that the content is engaging, relevant, and aligned with required standards.

We hope our books become a trusted companion for teachers, parents, and pupils, making the learning experience enjoyable, effective, and unforgettable.

Happy Learning!

Author and Publisher

ENGLISH - Ensures the development of language skills and promotes a functional understanding of the grammar. The reading material in prose and poetry form has been carefully chosen to motivate the learners to read, think, respond, and analyse.

MATHEMATICS - Mathematics relates the learner to everyday life and takes up the study of the subject not only as mere calculations, formulae, and data handling, as a platform to allow learners to comprehend, reason, analyse, and then find solutions.

EVS - Environmental Studies-helps learning of words associated with the natural environment and social behaviour in a child-friendly manner.

SCIENCE - Simple, clear, and graded presentation of topics on the world around to nurture the curiosity of the learner and help him/her understand scientific concepts.

SOCIAL STUDIES - Introduces the learner to the rich social and cultural heritage of India and the world at large.

GK - Gk covers overall learning of facts about the world around the kid with interesting events of day-to-day life, including topics of general interest with eye-catching pictures.

ART & CRAFT - This plays a significant role in a well-rounded and complete education. They help children engage in 'classwork' by bringing joyful learning and transporting them into the world of fantasy.

COMPUTER - It creates a learner-friendly environment for the young learners and helps them understand computers and their functioning. It is designed to make teaching more effective and interactive, using simple language to explain.

GRAMMAR - In the grammar, vocabulary improves all areas of communication. Comprehension includes a wide range of stories to hone sub-skills. Easy definitions, interesting word searches, picture-based tasks, and group activities are based on the concept of knowledge through fun.

Sankalp Semester Series
